WHO CAN'T KEEP A SECRET FOR THIRTY YEARS + ?

An amazing revelation has been made regarding a secret underground complex in the United States capable of harbouring over 500 people for a 60 day period in the event of a nuclear war.

The details, quoting from the Sunday Times (5 November 1995) were as follows:-

Ted Kleisner was offered the job of general manager of the Greenbrier, the most prestigious hotel in America. Although he did not know it, he had become the guardian of one of America's best kept secrets. Underneath his feet was an underground complex capable of accommodating the entire American Congress, it was a warren of passageways and bunkers. The underground site was built under the cover of building a new wing in the Greenbrier Hotel in 1959.

The Pentagon had gone to great lengths to maintain its secret bunker. A handful of military intelligence personnel, working under cover as television repairmen, serviced the bunkers facilities.

It was only after Kleisner began to query suspicious expensive invoices, that he could not account for, was he secretly informed of the extensive underground bunker beneath his feet.

He was taken through the three great banqueting halls, with their numerous support pillars, never realising that they were to hold up the roof in the case of a nuclear attack. From there he was taken up to a wall with rather gaudy green wallpaper, where a 25 ton nuclear blast door was revealed, leading to the secret bunker!

How could the American Military keep "aliens" and captured UFO's under wraps, for possibly over forty years? That is a question that many sceptics have raised about the "Roswell Crash" and other incidents. I believe that the Greenbrier Hotel revelation has answered that question quite well....."Quite easily and for just as long as they like!"

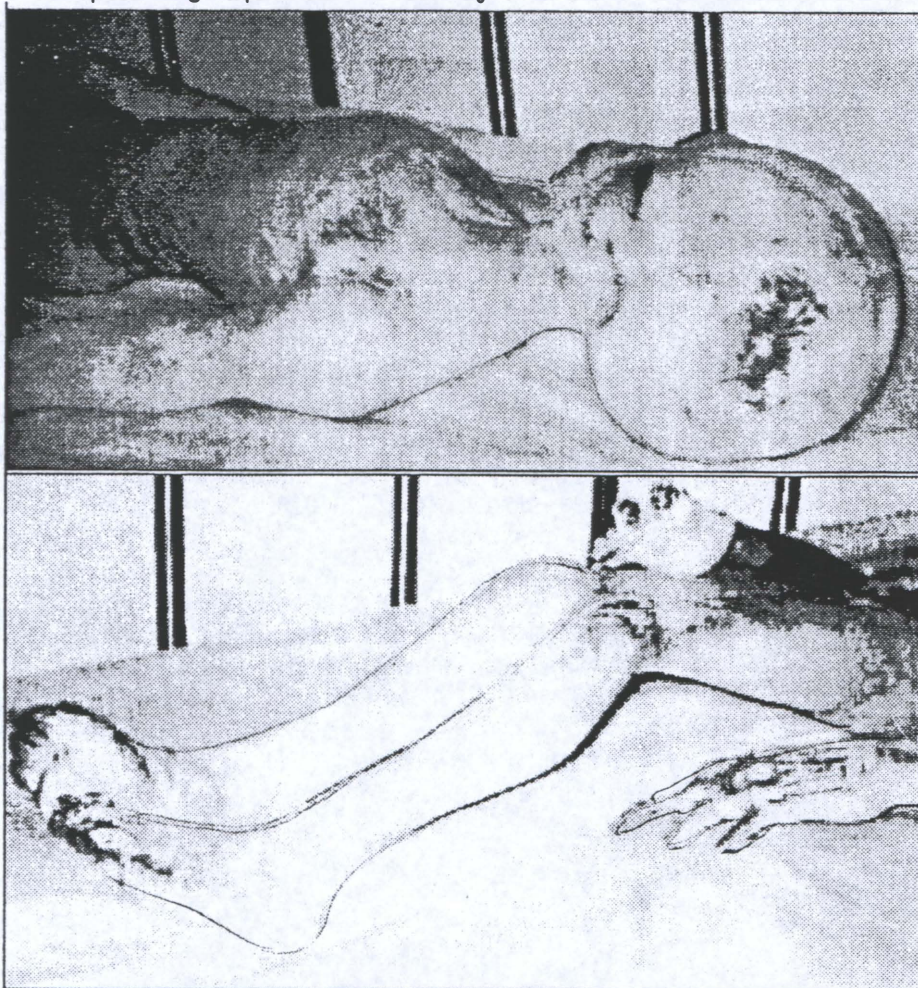

The alien autopsy analysis continues, with a prominent Pathologist stating that the body is real, but not human and Stephen Spielberg's model makers, stating that "if the body is a dummy and the guy that made it is still around, he can start work with us tomorrow!"

We have already learnt from the experts that the electric clock that can be seen on the wall is a model current with the period (1947), the Bell telephone model, with the coiled wire, is also a model that was in use at the time. Medical opinion has stated that the instruments being used and the type of instrument tray shown in use, were correct for the period. A prominent member of Eastman Kodak has given his opinion that the date of the film is correct for the 1947 period....so where do we go from here? (We know that there were at least two reported UFO crashes prior to July 4th 1947).

Just to make things a little more complicated, we have the matter of the mysterious piece of film footage shown to a select band, before the film was sent out on general release at £33 a time for a video copy.

Busty' Taylor was one of those that saw a piece of flickering film, far different to that recently released. The autopsy took place in a tent, by the light of storm lanterns, with white clad figures moving around the body in a murky light. "The body was about 6' long and the feet averhung the end of the stretcher" said Busty'.

Now we have a new mystery which appeared in the October/November 95 issue of the popular NEXUS New Times magazine. We know nothing about the "alien" body other than what has been printed above the picture, possibly it is a photograph of a dummy in the Roswell Museum!

These photographs were published in Ming Pao news weekly issue #1397, August 1995. According to the journalist, the entity shown was found by the US military in Roswell New Mexico, in 1947. Unlike the "Santilli" footage, the appearance of this entity is consistent with the testimonies of various witnesses & looks a lot more genuine.

SHEFFIELD "FLYING TRIANGLE" REPORT

We are indebted to new PRA member Mr D.R. Beglin for this report.

This incident took place near Low Bradfield village at approximately 1215am on the 29th July 1995.

Five witnesses sighted a triangular object bigger than a commercial airliner, travelling from North to South over the valley. They described the FT as flying "flat side forward" and making a low humming noise. It had a red light at each corner.

Shortly afterwards an orange/amber ball of light flew across the area towards the horizon, stopped and appeared to release a small red ball of light which rapidly travelled in an upward direction. Both objects then disappeared.

Shortly afterwards an orange ball of light was seen to be heading from South to North, followed by two aircraft which seemed to be chasing it! But the object accelerated away and all objects then disappeared over the horizon.

The witnesses independently all drew a sketch of the classic FT (Flying Triangle) with three lights, flying flat side forward.

----- A LANCASHIRE UFO REPORT

Mr Paul Walmsley was walking towards his home in Welddbank Lane, Chorley at about 7.30pm on Saturday 7th October 95, when he became aware of an object which he reckons was about the length of a double-decker bus.

"It was silver and cigar shaped with tiny windows and had orange, yellow and red lights beaming up from it." "It hung motionless about 100ft over the Perrite Rubber Works tower, went forward about 200yards and then went back."

"Then it shot off towards Preston like a bolt of lightning. The most fascinating thing about it was that it was absolutely silent. There was no noise at all."

"There was no way it was an airship as nothing could go that fast and then hover without making a sound. I'M convinced it was a UFO and that it didn't come from here."

Mr Walmsley said that another couple in Weldbeck Lane also pointed to the object and asked "what the hell is that?" But he was too absorbed to catch up with them and ask them their names.

ANOTHER "FLYING TRIANGLE" OVER DERBY
(12 September 1995 Time:0505)

Interview carried out by Mr C. Wilson

A British Airways stewardess of several years experience was driving along the A38 and just passing the Kingsway roundabout, leaving Derby, when she saw a "strange" object fly quickly across her path and heading in a North Westerly direction.

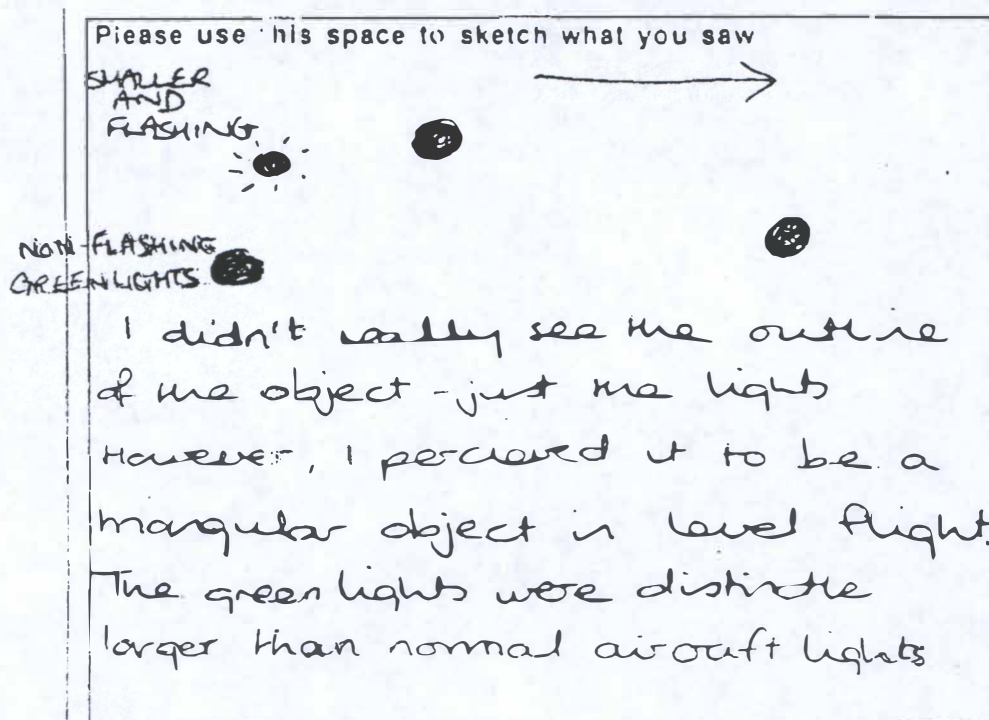

Mrs "SJ" stated that the object appeared to be triangular and had three non-flashing lights at each corner, at the rear and just out of line with the back two green lights was a red pulsating light. She commented that the red light was smaller than the green lights.

The FT was "quite low", about the height that a light aircraft would fly (approx. 2000ft.). "It was definitely below the clouds and I could see reasonably clearly as there was a full moon. It was not travelling as fast as a low level military jet, but seemed to be moving faster than a passenger aircraft at a similar height i.e. coming in to land."

"I instinctively knew that it was out of the ordinary. I 'froze' and stared, even though I was driving. It was about 10/15 minutes later when I saw a bright light shining through the low, light clouds, as I was passing Burton-on-Trent. The light was in front of me and almost overhead. It lasted about two seconds. Due to its location and angle, I feel certain that it wasn't a conventional aircraft."

The weather at the time was reported as being clear, with slight cloud cover, cool and dry. A full moon was visible.

A sketch made by the witness is shown below:-

A FLYING TRIANGLE REPORT FROM GUATEMALA

By Dr. Oscar Rafael Padilla Lara

(Translated by Enid Fynes-Williams)

Guatemala, Thursday

11 August, 1994

Interview with Mr Mishel Gueshne

Photograph of Triangle.

Mr Mishel Gueshne is the son-in-law of good friend Roland Castillo Valenzuela, whose daughter he is married to. He says he took a photograph of a UFO and unfortunately the negatives came out badly. He had the camera in his hand when he saw the object pass overhead, and he took the photograph, the good thing is that the best one came out, exactly where the electric wires are, and the object was going over the wires, then he could see the sides (of UFO).

Mishel Gueshne explains that the first and second photographs came out very faint, but he believes that they could be improved in a laboratory.

I asked him what shape it had and he told me that it was like a lance head, and that at the back it had something like a light aircraft generates.

He says it was like a mass of metal but he imagined it as mottled with spines, or something like that.

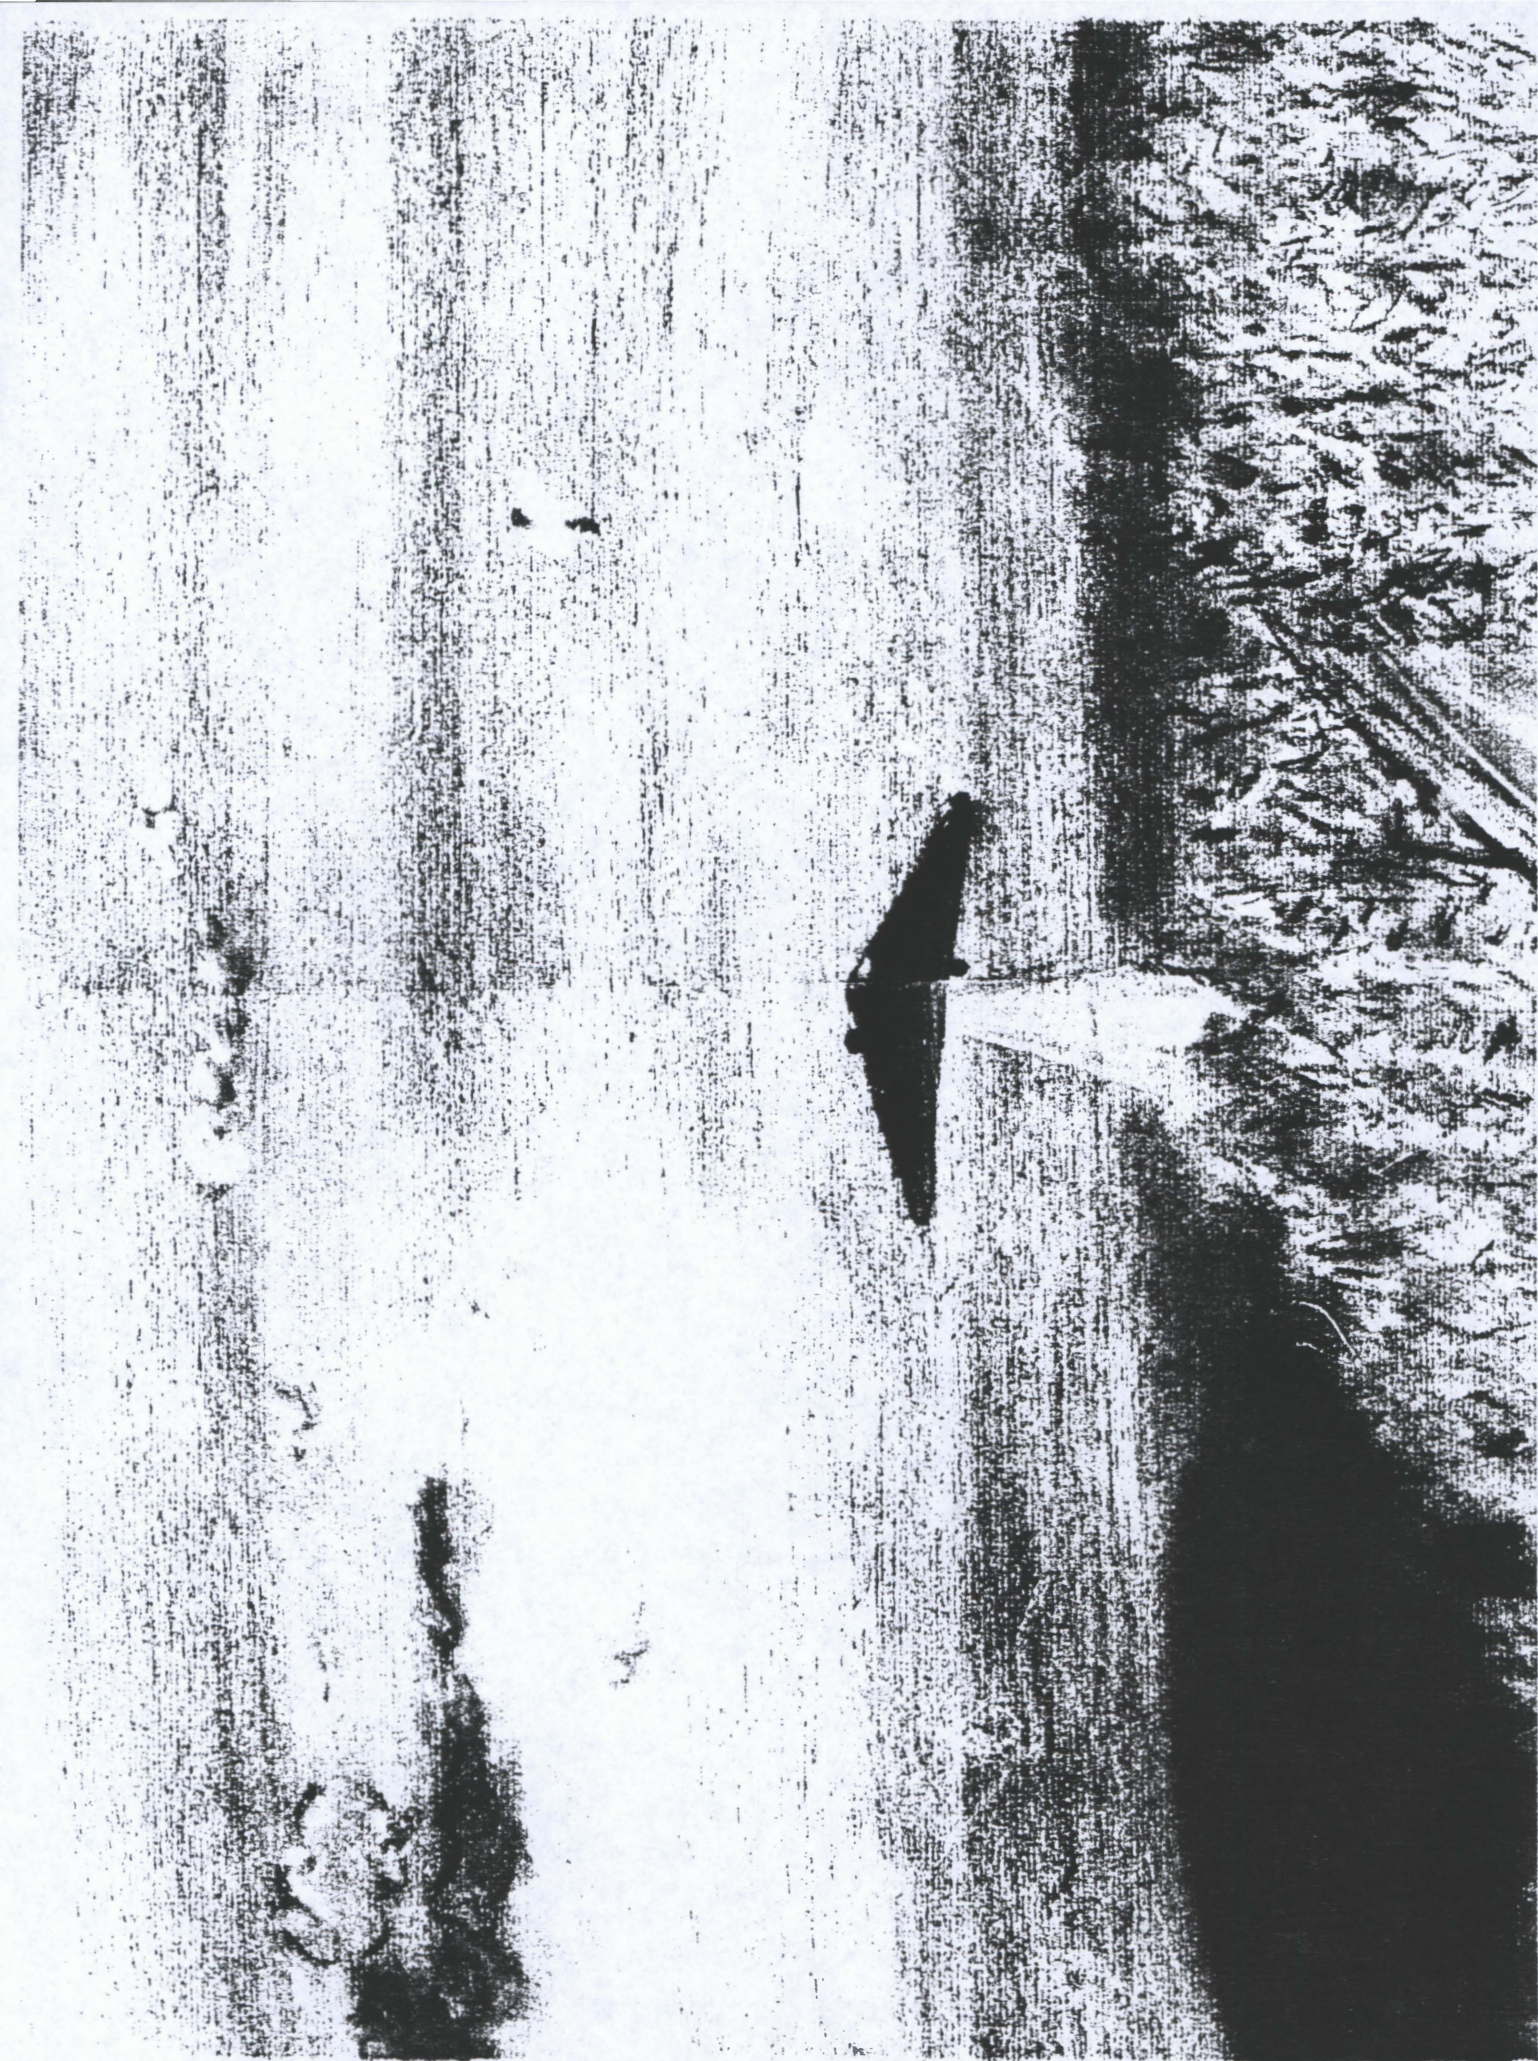

Apart from himself, his mother, his wife and his son were the first to see it.

As for the time indicated it was late afternoon, it would be about 5.0'clock, and he added that it did not have any characteristic smell or anything else of this kind.

Conclusion.

Regrettably in this case, I have only collected his statement in my files, and unfortunately I do not have access to the famous photograph to see the degree of credibility it has, but other similar cases are known throughout the world.

I can vouch for his integrity, as a professional, but I would like to have the photograph at hand, to make a better judgement. Amongst other things I am limited to give an opinion, because truly I would not know what to say.

A FLYING TRIANGLE NEAR SUTTON-IN-ASHFIELD

From a sketch by witness Andy Emmerson :December 1994

EARTHQUAKES & THE U.K.
By Jeff Whitear 11/11/95

Over the last eight years I have formed the opinion (like a number of other people) that there is a connection between the Earth's energy and the sighting of UFO's.

There have been a number of UFO sightings in the vicinity of earth fault lines and also near active volcano's.

I have recently focussed my attention on the United Kingdom and central Europe. I believe that we may have a new stress line in the earth forming across this area, (see map on next page) as the result of increased stress within this part of the planet.

There has also been a noticeable increase in the number of Crop Circles over this area.

By taking a line from North Wales, through Continental Europe and into Armenia we can plot the earthquake activity over the last eight years as shown below:-

Country	R/Scale	Month	Year
Armenia	6.4	12	1988
N/Wales	5.3	4	1990
N/Wales	4.5	7	1990
Georgia	7.1	4	1991
Georgia	7.0	5	1991
Romania	5.5	7	1991
Romania	(?)	8	1991
Romania	(?)	12	1991
Midlands U.K.	3.1	2	1992
Belgium	6.3	4	1992
Austria	(?)	7	1992
N/Wales	3.5	7	1992
Georgia	6.7	10	1992
N/Wales	(?)	2	1994

Records show that every two years there has been an earthquake in the U.K. What will 1996 have in store for us? More quakes and more UFO sightings?
J.W.

Editors Note: Readers will recollect that in the October issue of OVNI, Terry Walters claimed that he had been present on an "alien craft" when it carried out a survey on an Earth fault line in northern Russia. It seems that the aliens were becoming concerned that local mining activity could result in a major earthquake. (Terry has recently been invited to accompany an eminent Egyptologist to survey the Sphinx. Terry revealed some interesting facts about the Sphinx, which the scientist says he has only just learnt after 12 years of research!)

The Evening Sky

November 1995

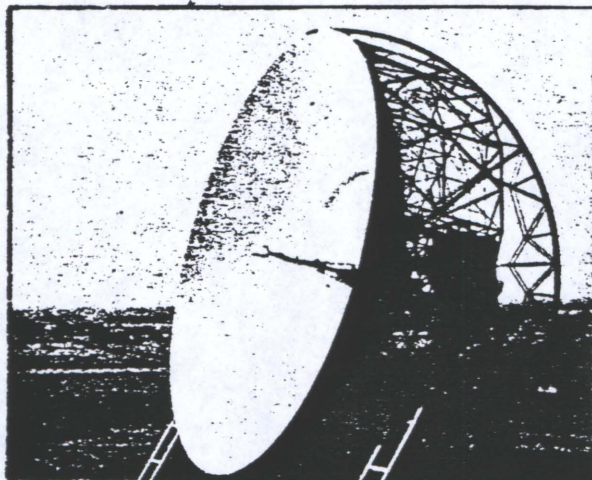

Autumn is my favourite season with much evidence of large scale environmental change. A finely tuned ecology and sense of journey's end is all around. You can literally smell the Earth in Autumn. It must rate as one of the most wonderful aromas in the universe.

Venus, Jupiter and Mars are very low in the southwestern sky during the twilight dusk and all three are easy to spot. The Earth is about the same size as Venus and when you observe Venus, think of our little planet Earth: a delicate, fragile ball floating in the vast emptiness of space. It is always a great joy to actually identify another world as it can often give us a sense of place in the cosmos.

All three planets are moving eastward with respect to the background stars. The slowest planet, Jupiter, is initially in the lead and the fastest planet Venus at the rear. Their positions are reversed by the end of the month. On November 18th all three planets will be at their closest to each other. I can guarantee that switchboards will be jammed with calls from members of the public who are convinced they have spotted a UFO.

On November 24th the young crescent Moon has spectacular encounters with the three dancing planets. There will be a Full Moon on the 7th. It is a great time to be out after midnight at Full Moon. Moonlight shadows can play funny tricks with your imagination and if you are alone in the country it can be quite scary: the Full Moon, the eerie shadows and sounds of the wild!

Astronomers have been heightening public awareness of the problems caused

Jodrell Bank Radio Telescope - 1957

by light pollution in recent years. Another form of pollution will soon be affecting Radio Astronomy. Digital modulation (using ones and zeros - computer speak) is set to revolutionise media broadcasting. Digital modulation can produce significant radio interference. Normally, the unwanted emissions are too weak to interfere with an ordinary radio set. However, they are more than strong enough to overwhelm a radio telescope picking up minute signals from edge of the universe. I hope astronomers do not mistake Radio One broadcasts for alien life forms!

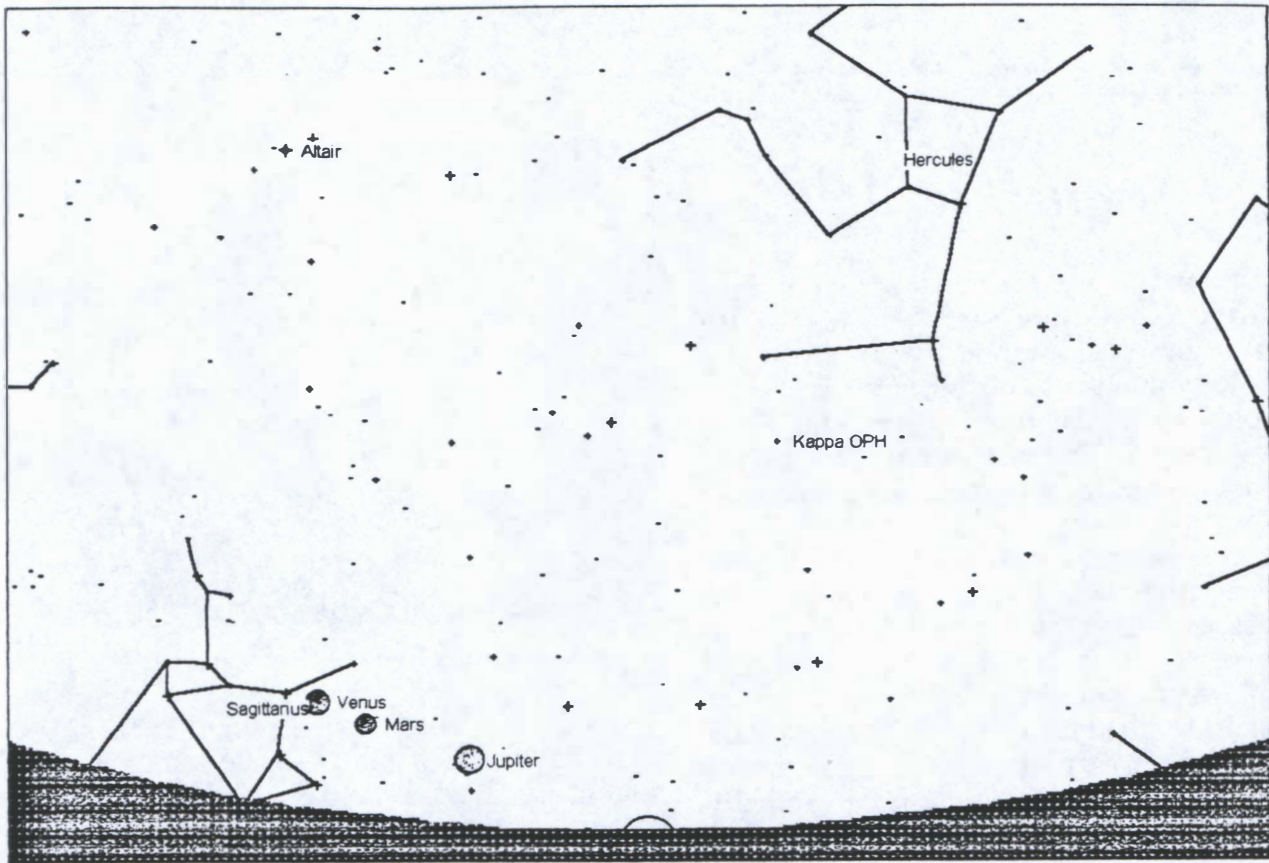

There is much compelling evidence linking solar activity to Earthly weather. Historically, numbers of sunspots rise and fall over periods of between 9.7 and 11.8 years. The Sun is also brighter when the level of activity such as solar flaring is high, during sunspot maxima.

Variable brightness of the Sun during solar cycles provides a physical explanation for the variations in air temperature on Earth. Since the 17th century, the Sun has brightened by about 0.4% and we may now be due for a downturn. In the next 50 years the Earth may become cooler!

Enjoy Your Evening Sky!

Barry Parkinson

'The Evening Sky' - P.O. Box 4002 - Milton Keynes - MK13 7ER - U.K.

Evening Twilight - November 30th 1995 Venus - Mars - Jupiter

If you have been watching the sunset every evening throughout November you will have noticed the planets' movement eastward, especially Venus, which is travelling very fast and Mars, not so fast. Notice that Jupiter's position relative to the background stars has hardly changed.

UFO alert as mystery craft 'buzzes' estate

by DAVE FOX

TERRIFIED residents of a Runcorn estate were 'buzzed' by a flying saucer which appeared to be sucking water out of the River Mersey.

The eerie incident is the latest in a spate of sightings of UFOs - unidentified flying objects - which are now being investigated.

Seven people at Castlefields saw the mystery object over the Mersey. One of them, Miss Karon Conlon, 31, says it veered towards the estate when some teenagers waved at it.

'It was dark at the time and I was just coming back along Ferryview Walk after I had been shopping when I glanced towards Widnes and a light caught my eye,' she said.

'Three teenage girls and a young couple were pointing at it. I could see a whitish object which appeared to be hovering over the river sucking up water or beaming something up.'

'I could see it wasn't a plane or a helicopter. Then it began to move off towards Warrington.'

'The teenagers waved at it and it changed its direction and headed towards us. I just freaked because it was such a frightening experience.'

'As it approached us, it tilted slightly and we could see triangular-shaped lights underneath. I couldn't believe it because it seemed to look at us and then flew off towards Helsby.'

Unemployed Miss Conlon, who lives in Rotherham (Jose at Castlefields, added: 'I was always very sceptical about UFOs but this has changed my view. I just can't see what else it could have been.'

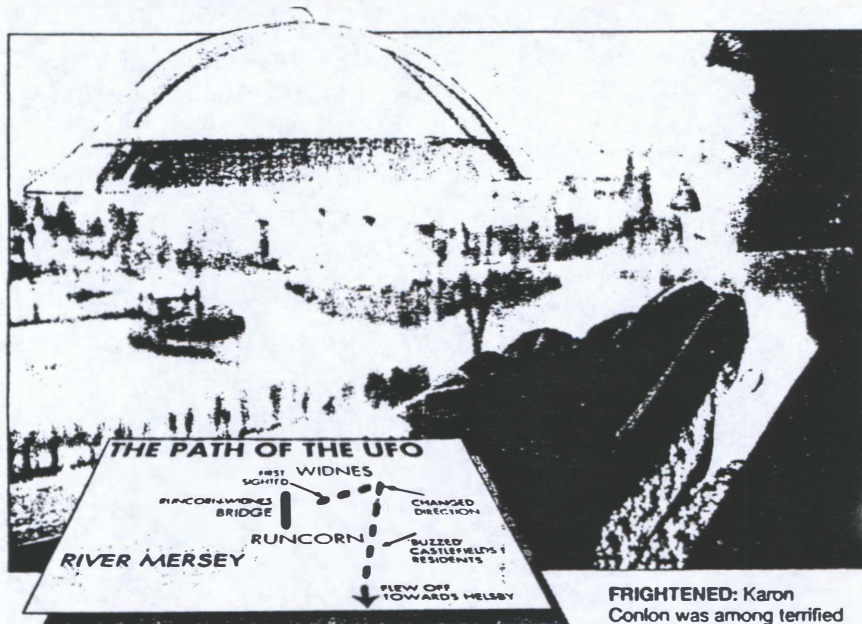

After the Monday incident, a neighbour of Miss Conlon's, who asked not to be named, said she also saw a UFO.

'It was a big, orange plate shape and appeared to hover above Hulton Castle,' she said.

British UFO Research Association spokesman Philip Mantle said there was no obvious explanation for the incident.

He claimed: 'We have had a lot of reports describing these triangular shaped lights and we are sure it has not got anything to do with the military.'

'We will investigate this because it is quite uncommon to hear reports of a UFO sucking up water.'

FRIGHTENED: Karon Conlon was among terrified residents who say they were 'buzzed' by a UFO which appeared to be sucking water from the Mersey. Our artist's impression of the UFO has been superimposed on the picture above. 12785812

THE RUNCORN SIGHTINGS

- UFO hunters say the Runcorn sighting ties in with a report from January 6 of a triangular-shaped object seen by a pilot on his approach to Manchester Airport.
- Flying saucer investigators say 95 per cent of eye-witness sightings can usually be traced to some other explanation but five per cent remain unexplained.
- Reports over the past year in Cheshire

have often referred to a cigar-shaped craft with different coloured bands across it.

- Past reports of UFOs over Runcorn include a spate in 1972 when many people saw an object 'like a teapot without a lid.'
- Anyone who wants to report sightings to the British UFO Research Association can telephone Philip Mantle on 0924 444049.

UFO's stealing our water? Reservoirs are also a great attraction!

"Our next guest is a gentleman who claims to have actually been taken aboard a U.F.O. . . ."

TALE ENDERS

TIME TRAVEL MAY BE POSSIBLE admits Professor Stephen Hawking: "If you combine Einstein's general theory of relativity with quantum theory, it does begin to seem a possibility." (Sunday Times 1 Oct.95)

MINI TRIANGLE BUZZES SWEDISH FISHERMAN: Martell Astrom had a surprise last June 94, when he decided to go fishing in his small boat on a lake near Floda. He heard a sound like a jet fighter and saw a small black delta, like an arrow-head about two metres long flying low over the lake. (AFU Newsletter)

MAZDA BALLOON SCARES THE LOCALS: An illuminated gas filled mini-airship advertising Mazda cars has been disturbing people in the Ilkeston area by hovering around at night and emitting a "fluorescent glow" said witnesses!(Ilkeston Advertiser 10 Nov.)

BONNEYBRIDGE UFO ACTIVITY is causing concern to the local inhabitants. Out of a community of 5,500, over 2,000 townspeople have reported sightings! (The Guardian 31 October)

MYSTERY LIGHTS were seen in the sky over Southsea and Gosport (Hants.) on the night of 18th October. "We watched a circle of light moving across the sky. It had beams like sunrays coming out of it" said Samantha Mills. (Press Cutting: Brian Maguire)

SCIENTISTS DISCOVER NEW STAR SYSTEM similar to our own which could contain extraterrestrial life! (Sunday Times 8 October)

WEST MIDLANDS CCCS were given a talk by Omar Fowler on the probability of H/F energy producing Crop Circles, Saturday 11th November at their venue in the centre of Birmingham. Editors comment "I'd rather be abducted than face the Birmingham inner circuit road again!"

NEXT MEETING

We had arranged for Busty Taylor to speak at the next meeting on Tuesday 21st November, but unfortunately he has had to cancel as he is unexpectedly off to the States on a short lecture tour.

The programme at the Stanley Club, Stanley Common (A609) Nr Ilkeston on the 21st Nov. 8pm has been changed to a new video presentation:

"UFO's THE BEST EVIDENCE"

&

"HOTEL GREENBRIER: THE SECRET BUNKER"

Plus all the latest UFO news. A number of publications & exchange magazines will be on sale on the night.

Non Members Welcome. Admission £1.00
